

Move Your Fleet Forward with Speech-Powered Operations

aiOla's patented speech technology integrates seamlessly into various workflows to enhance operational efficiency, improve safety, save time, and streamline operations. Teams across state lines and global borders can work smarter and more collaboratively, connecting data points, gaining insights, and identifying trends to streamline workflows and enable process optimization.

Our patented automatic speech recognition (ASR) and natural language understanding (NLU) technologies are purpose-built to tackle the unique challenges faced by the delivery industry, offering a tailored solution for the transportation and logistics sectors.

Packing Speech and Efficiency Together

- Maximize efficiency, productivity, safety, and operational excellence with hands-free workflows and task completion
- Complement human intelligence by enabling teams to speak through inspections and checklists
- Supports over 100+ languages, accents, dialects, and unique business jargon, making communication inclusive and adaptable
- Performs accurately, even in noisy environments, ensuring accurate data capture and real-time alerts for safety concerns
- Capture valuable insights with data analytics and trend spotting for data-driven decision making
- Integrates seamlessly with existing technology stack, including CRM or ERP systems
- Little to no learning curve, simplifying adoption and allowing teams to speak naturally and confidently

Sample Use Cases

Inspections

Optimize pre-delivery inspections, allowing fleet managers to breeze through the process. Cut inspection time from 6-15 minutes per vehicle to just 60 seconds per vehicle with speech technology. Real-time alerts promptly notify mechanics of any detected issues or defects, ensuring swift action for repairs. All inspection data is sent to managers for valuable insights, streamlining maintenance schedules and improving overall efficiency.

Rental Inspection

During peak seasons, there's a need for additional trucks to meet delivery deadlines. With the integration of speech technology, pre- and post-rental inspections are conducted swiftly. Automation reduces manual processes to create an efficient truck rental workflow.

aiOla's Impact:

Speak More, Deliver More

Reduce:

Overall inspection processes and checklists, paper-based processes, manual data entry, diagnostic and repair time

Optimize:

Delivery time, customer satisfaction, safety, predictive maintenance, data analytics, and overall operational efficiencies

Ready to speak productivity into action?

aiOla is ready to listen.
